DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a molecular dipolar rotor, classified in class 310, subclass 10.
 - II. Claims 21 and 23, drawn to a molecular dipolar rotor having two H atoms, classified in class 423, subclass 342.
 - III. Claim 22, drawn to a molecular dipolar rotor having two NC and two OM_e groups linked to a carbon structure, classified in class 556, subclass 415.
 - IV. Claims 24 and 25, drawn to a molecular dipolar rotor having 5 -Hg-S-Z' groups where Z' is -(CH₂)_n Si(OR)₃, and n is an integer from 0-15, and R is an alkyl group, classified in class 556, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II, III or IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as constituting a molecular dipolar rotor with a different chemical composition. See MPEP § 806.05(d).

3. Inventions II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

claimed because each molecular dipolar rotor has a special and patentably distinct chemical composition. The subcombination has separate utility such as creating a molecular dipolar rotor with different operation characteristics.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III and IV, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups III and IV, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group IV, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. A telephone call was made to Susan K. Doughty on August 7, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
